

Montour Solar One

FACT SHEET
DECEMBER 2021

The Montour Solar One project is a joint venture between Pattern Energy and Talen Energy that will provide cost-effective renewable energy to the region.

The project will utilize land owned by Talen Energy, adjacent to Talen's Montour Steam Electric Station that is independent from the Station and will have no impact on its operations.

Our approach to building successful facilities is to work closely with residents in a way that is respectful and fits the needs of the landowners and communities that host us. We seek to build partnerships and bring long-term benefits to where we operate. We prioritize relationship building and open communication and aim to address and incorporate feedback, and further local benefits.

Projected Schedule

MontourSolarOne.com

Community Benefits

Community Giving

We are involved in community giving throughout the life of our projects. Acting as a good neighbor benefits both the communities where we develop and the long-term success of our facilities. A Community Benefits Program will support the local economy and ensure benefits to the region have a lasting impact through sponsorships and donations.

Economic Investment

Represents a projected investment of \$100 million in Montour and Columbia counties.

Community Partnership

The project will utilize local companies, services, materials, and create jobs.

100–150 construction jobs including equipment operators, electricians, laborers, and others

Economic Boost

Increased demand for lodging, food services, gas, groceries, and other local services used by the project team.

Harvesting the Sun

Montour Solar One is being designed as an approximately 100 MW facility.

It will provide safe, affordable, renewable electricity to power the needs of more than 50,000 Americans.

Pattern is one of the world's leading renewable energy generation, transmission, and energy storage companies, with operating and development footprints in the United States, Canada, Mexico, and Japan.

Headquartered in the United States, our global portfolio includes more than 30 utility-scale renewable power facilities and transmission assets. Our facilities serve a diverse range of customers who provide low-cost energy to millions of consumers.

With our experience building renewable energy projects worldwide, we are well-positioned to continue delivering high-quality facilities for years to come.

Talen Energy is one of the largest competitive power generation and infrastructure companies in North America. Talen owns and/or controls approximately 13,000 megawatts of generating capacity in wholesale U.S. power markets, principally in the Mid-Atlantic, Texas, and Montana.

Talen is developing a large-scale portfolio of renewable energy, battery storage and digital infrastructure assets across its footprint. Our goal is to lead the energy transition through our Force For Good Platform, which will create opportunities for our people and communities as we decarbonize our fleet.
